PERSONAL PROJECTS

Spring Boot Photo-App (09/2019 – Present)
- A multi-module Maven Spring Boot project featuring Eureka Discovery, Zuul API Gateway, H2-In Memory Database, Spring Security, Git Cloud Config, Actuator, MySql Driver, RSA encryption keys, JSON web tokens, and more. Still in progress.
- This project was originally built by Sergey Kargopolov.
- Each module is individually posted on my repository.

jdevmin.tech (09/2019 – Present)
- Ubuntu server on Digitalocean.com that I personally own and manage myself. It is currently in development.

Battle For Thalaanar (04/2019 – Present)
- LibGDX Trading Card Game.
